INSPIRING THE NEXT GENERATION OF LEADING ENGINEERS, SCIENTISTS & INNOVATORS

Year 10 Prospectus 2020/21
The UTC Leeds Employability Skills

The seven employability skills are central to the curriculum and the driving force behind all aspects of UTC Leeds. They were devised in conjunction with our employer and university partners, to ensure that students leaving UTC Leeds are highly employable. Through the unique opportunities that studying at the college provides, students will demonstrate a high level of confidence and skill in these areas, setting them apart from other candidates.
Welcome from the Principal

Welcome to UTC Leeds, the first University Technical College in the Leeds area.

Based in the growing educational hub at Leeds South Bank, UTC Leeds is an exciting new type of school created to teach students a range of scientific and technical skills to prepare them for a challenging, stimulating career in engineering, science and advanced manufacturing.

I am delighted to be the Principal of UTC Leeds. I feel extremely honoured and privileged to have been chosen to continue to move the college forward. This is a great opportunity for me to be part of a team that supports our students in becoming the next generation of world-class engineers and scientists. I am passionate about the college, and we are committed to becoming a centre for excellence for academic and technical learning.

I share the governors’ vision of creating a hub of excellence for the young people of Leeds and its surrounding areas. The Yorkshire region has a real need for well-trained engineers, and by working closely with local businesses and the University of Leeds, we aim to meet this demand and improve the life chances of students.

We will achieve this by equipping them with the skills to access college courses, degree opportunities and successful apprenticeships with local businesses. So far, 100% of our students have gone on to achieve positive destinations.

The governors, in partnership with the Baker Dearing Education Trust, have ensured that UTC Leeds has the best support, equipment and technology at our disposal. We will enthuse and equip ambitious young people and prepare them for future careers in their chosen field, allowing them to learn the most modern and up-to-date skills currently needed and, of course, preparing them for those that are yet to be developed.

I very much look forward to meeting you.

Alex Burnham
Principal
Introducing UTC Leeds
Preparing young people for high quality careers

University Technical Colleges (UTCs) have been designed to meet the needs of employers for up-and-coming young talent with the right skill sets and knowledge to fill the jobs of tomorrow.

UTCs take students as young as 14 and offer a combination of technical qualifications alongside GCSEs and A Levels. This combination of academic and technical learning is unique, equipping students for professional careers through places at top universities, as well as through higher and advanced apprenticeships.

Opened in September 2016, UTC Leeds offers high-tech, cutting-edge facilities and a first-class educational experience. The UTC is the first school in the Leeds City Region to provide high-quality academic and vocational training focused specifically on the engineering and advanced technology sectors.

The curriculum is developed with global and regional employers as well as the University of Leeds, and the learning experience includes a broad range of activities with industry professionals and academic experts.

UTC Leeds is supported by over 70 employers, including major industry brands such as AGFA, Siemens and Unilever. Working regularly with employer partners in a professional work environment where expectations are high ensures that students gain the work ethic and attitude that employers are looking for.

Project work is focused on solving real-world issues, not just business issues, but also social, medical and environmental challenges. Inspirational events and national competitions form a key part of students' studies. In addition, students are able to experience a range of city-wide business events featuring leading speakers from across the sciences, and industry, supporting their learning while contributing to an enjoyable, varied educational experience.

For GCSE students, there are a variety of routes available involving different combinations of GCSEs and technical qualifications. After completing their GCSEs students are able continue their studies at UTC Leeds through to age 18 or leave at 16 to pursue other routes, including apprenticeships.

“The UTC will establish a talent pool of creative, passionate, energised and capable young engineers that will enable Siemens to fill future positions in production, engineering and project roles.”

Simon Nadin
General Manager, Siemens Mechanical Drives
We equip young people with the technical, personal and professional skills that the UK economy needs.

Meet Tim Smeaton, Head of KS4

Head of Key Stage 4, Tim Smeaton, is a former Associate Vice Principal who joined the UTC in September 2019, inspired by the college’s focus on the world of work. Tim also teaches maths at the UTC.

“What’s different about teaching maths at a UTC is the way the students’ studies are linked to practical work. We link all the topics together so that learning is more integrated. Maths isn’t just maths in isolation, it’s linked to engineering so students can understand maths in context.”
A Vision for the future

It is our vision to develop students who will make a valuable and lifelong contribution to society and the engineering industry.

Our students will study a stimulating and relevant curriculum and be exposed to cutting-edge technologies and employer-led projects that will give them a challenging, well-rounded education. Students leaving UTC Leeds will be recognised as young people with a strong ambition to succeed, who are independent learners and creative problem-solvers with the social and technical skills that employers look for in today's competitive market.
Six reasons to choose UTC Leeds

**Exciting, real-life projects**
You will work on real-life challenges from the world of work and participate in inspirational workshops and competitions to develop your critical thinking, creativity, team working and problem solving skills.

**A chance to make a difference**
You will have the opportunity in your project work to find solutions to real-world social, healthcare, medical and environmental problems that will have a positive impact on the local community and industry.

**Employer-led learning**
You will learn from employers in a range of roles through masterclasses, mentoring sessions, trips and work experience, giving you insights to support your choice of future careers.

**Academic excellence**
UTC Leeds is sponsored by the University of Leeds, which is among the top 100 in the world for engineering and technology, and our teaching staff are experts in their fields.

**State-of-the-art facilities**
You will learn in amazing hi-tech facilities in our unique building, which combines a state-of-the-art educational environment with the city’s proud manufacturing heritage.

**Treated like adults**
All of our students are focused on their futures and here to learn. This is the first stage of your access to business and employment and you will be treated as an adult and offered support where needed.
Working with employers

What makes the UTC special is the close association and partnerships with employers and universities.

The employer-led curriculum and the whole approach of the UTC enables students to develop their employability skills such as problem-solving, time management, organisation, team working, leadership and communication.

Problem-solving projects, major competitions and mentoring

The student experience at the UTC is dominated by employer-led projects. These projects drive not only the specialist, technical elements of the curriculum but also the academic and employability elements too.

Students work in project teams to identify, explore and evaluate possible solutions to real-life engineering problems, enriching their learning from across the curriculum while building crucial professional skills. All students have the opportunity to undertake a number of roles within a team and also to participate in national competitions. Support and guidance is provided throughout, with employer partners offering mentoring and financial support to help complete the project.

In Year 10, students work on major projects to identify, explore and evaluate possible solutions to engineering problems, with many projects addressing real life issues affecting the local community and environment.

Making a difference

Through project work, students have the opportunity to find solutions to problems that will have a positive social, medical or environmental impact. For example, students are tasked with finding creative solutions to utilising wasted heat from within a factory and reducing carbon emissions, or with making life-changing artificial limbs using 3D printing to help people who have lost limbs.

Developing commercial acumen

Students are challenged to create products for business that not only function and stand out technically but that would be commercially viable and succeed in the marketplace, helping to develop highly transferable business and entrepreneurial skills.

Work experience and visits

From short, week-long work placements on site through to longer summer placements, the opportunity to learn from skilled professionals in a range of roles and develop technical skills is a key focus of the educational experience at UTC Leeds, including regular trips to a wide variety of workplaces.
These are just some of the 70 employer partners you will be working with.
State-of-the-art facilities

A unique setting

UTC Leeds is based in a unique setting in the growing educational hub at Leeds South Bank, which is fast becoming known as a vibrant, attractive neighbourhood.

An £11 million pound investment in the UTC has created a modern, cutting-edge college environment with capacity to accommodate 600 students. The college building is adjacent to BRAIME Pressings, a long-established company with a proud history of engineering excellence and now a key employer partner of the UTC.

The state-of-the-art building has been designed with areas designated for scientific research, advanced design and CAD, manufacturing and robotics, as well as bespoke project spaces, classrooms and a lecture theatre.

The surrounding area is attracting significant ongoing investment to make it an outstanding destination for learning, creativity, leisure, residential and commercial development, already providing a source of industry connections for the UTC.

World-class facilities

Students at UTC Leeds have access to world-class facilities and cutting-edge new technologies.

Funding from the government and sponsorship from our employer partners has enabled specialist equipment and training to be available for all UTC students to support student learning, research and development in science, engineering, computing, design, graphics and robotics – the kind of facilities and training that are beyond the scope of regular schools and academies.

Students are also encouraged and supported to visit our employer partners and the Faculty of Engineering at the University of Leeds to use industry-specific equipment not available in other educational settings.

Overall, the UTC offers an excellent environment for teaching and learning with a large lecture theatre to support formal university or industry-style presentations in the timetabled curriculum, as well as classrooms and a cafeteria where students can meet outside of lesson time to socialise with friends.
Engineering & Advanced Technologies

Engineering and science are all around us. From the cars we drive, the computers and phones we use every day, to the solar panels we see on house roofs, the medical equipment our doctor is using, even the food that we eat!

The knowledge and skills of an engineer have at some point been involved in the design and manufacture of all these products, making it an incredibly diverse and fast-paced area to work in with the potential to make an impact, bring about change and gain access to exciting opportunities. From designing and constructing visionary buildings, or developing the latest green technology to help save our planet, to inventing new robotic medical devices which can improve healthcare.

To be an engineer, scientist or designer requires curiosity, creativity and communication skills – not just technical and scientific ability – so it needs a wide variety of people. In fact, different types of people, women as well as men, people from different cultural backgrounds, with different ways of seeing the world and a variety of skill sets, will be essential to develop all the up-and-coming opportunities for engineering and advanced technologies in the decades ahead.

UTC Leeds welcomes applications from all types of student with the enthusiasm, interest and determination to study for a career in this exciting and challenging area.

£30,557 is the average starting salary for a graduate working in engineering and technology. 85% of engineering graduates go into paid work or further study within six months.*

*The Engineer 2018
A woman’s world

UTC Leeds is working closely with the WISE campaign (www.wisecampaign.org.uk) to support our female students to access career opportunities and develop as role models for future young women in the city to follow these routes.

“Engineering provides thousands of interesting and varied career opportunities for women, on a global scale. Women often approach challenges differently to men and can bring an entirely new perspective on solving problems. It’s an industry that requires so much more than technical ability. Engineers need an inquisitive mind, disciplined logical thinking, creativity, attention to detail, good communication and leadership skills. Women can make a significant contribution to the future of engineering and be role models for the next generation of female engineers.”

Victoria Hopkins
Managing Director, Hopkins Ltd

Leading the world

The UK manufacturing industry is acknowledged as a world leader in several sectors from automotive and aerospace engineering through to the creative industries and utilities. In fact, the UK employs over 5 million engineers and the number of jobs is set to double, with an estimated 1.28 million new science, technology and engineering professionals needed in the UK by 2020 to compete in the global market.

“Engineerings provide thousands of interesting and varied career opportunities for women on a global scale. Women often approach challenges differently to men and can bring an entirely new perspective on solving problems. It’s an industry that requires so much more than technical ability. Engineers need an inquisitive mind, disciplined logical thinking, creativity, attention to detail, good communication and leadership skills. Women can make a significant contribution to the future of engineering and be role models for the next generation of female engineers.”

Victoria Hopkins
Managing Director, Hopkins Ltd

Developing the talent pool in the Leeds City Region

Leeds and the wider city region is home to the largest manufacturing sector in the UK worth over £7 billion pounds!

With over 140,000 employees in 7,000 varied manufacturing businesses, including large companies such as Coca-Cola, Siemens, Cummins, Haribo, BorgWarner, VTL and Turbo Precision, Leeds City Region offers future engineers opportunity to showcase their skills globally and provide innovative solutions to often difficult production challenges.

Students studying at UTC Leeds have access to this amazing wealth of opportunity through our close links with employers. As a result, graduates of UTC Leeds are equipped with the technical, personal and professional skills required to succeed in this dynamic and thriving economy.

“We believe the UTC will help to develop the next generation of engineers and manufacturers in a whole range of related disciplines, firing up once more the industrial strength of the North.”

Roger Marsh
Chair, Leeds City Region Enterprise Partnership
Our exciting curriculum offer, including employer-led projects and enrichment activities, is designed to give students a well-rounded education to open up the best possible opportunities for future study and career progression.

It enables students to develop the following key employability skills that are highly sought after by today’s leading employers:

- Enquiry and analysis
- Self-management and organisation
- Leadership and management
- Teamwork and collaboration
- Problem solving and resilience
- Creativity and ingenuity
- Technical confidence and skills

The seven employability skills are central to the curriculum and the driving force behind all aspects of UTC Leeds. They were devised in conjunction with our employer and university partners, to ensure that students leaving UTC Leeds are highly employable. Through the unique opportunities that studying at the college provides, students will demonstrate a high level of confidence and skill in these areas, setting them apart from other candidates.
**GCSE and Technical qualifications**

All our GCSE students study a broad and balanced curriculum, designed to enable students to study a full range of subjects, whilst also focusing on our specialist areas of engineering and advanced technologies.

All students will study a minimum of eight qualifications, made up of both GCSEs and technical awards. Students may also study for further approved qualifications as appropriate.

**All students will follow a core GCSE curriculum of:**

- GCSE Mathematics
- GCSE English Language and Literature*
- GCSE Triology Science
- Cambridge Technical qualification in Engineering Design
- Cambridge Technical qualification in Engineering Manufacture

* A bespoke curriculum may be provided in some cases

**Optional subjects:**

In addition, you will have the option to choose from:

- GCSE Computer Science
- GCSE Geography
- GCSE Product Design

**Build knowledge and understanding of engineering through:**

- Contributing in teams to a series of industry-led major projects
- Meeting skilled professionals and understanding roles, pathways and career opportunities
- Partnering with the engineering faculty at the University of Leeds
- Working with mentors from industry and education

**Develop life skills, independence and knowledge through:**

- A curriculum with embedded opportunities for students to develop employability skills
- Leading and taking part in enrichment activities
- Taking part in RE, PSHE, Citizenship and sports activities
- Receiving the very best in careers education
In supporting our students on their journey to the best grades, UTC Leeds' teachers continuously monitor each student’s progress and adapt their lessons and tasks set accordingly. Progress is formally assessed and shared with students and parents three times a year. Students’ individual programmes are amended on the basis of these reports and additional support provided when necessary.
Pathways after Key Stage 4

At the UTC, excellence is our driving force. We want to ensure that you are equipped for a fulfilling and rewarding career, whether you progress onto an apprenticeship, into university, or directly into employment supported by continuous professional development.

We work with our extensive range of partners, including universities, employers, specialist training centres and apprenticeship providers, to offer you the widest possible range of options for progressing from the UTC.

At every stage, you will have access to independent advice and guidance as well as profile team leader and mentor support to help you choose the right option for you.

After two years, you may choose to leave the UTC to pursue Advanced Apprenticeships or can also progress into our sixth form, if their grades meet the entry requirements, to study GCE A Level maths, alongside up to three further A Levels or Technical awards in more advanced areas of engineering and design. Students can choose from a full range of A Levels such as physics, chemistry, biology, computer science, product design or further maths.

Example degrees include:
electronic and electrical engineering, software development, control systems and robotics, medical, mechanical and environmental engineering, automotive and aeronautical engineering, telecommunications

University

Well paid job in engineering, science or a high-tech sector

Higher & Degree Apprenticeships
Entry with A Levels and/or Technical Qualifications

Advanced Apprenticeships
Entry with Level 2 Qualifications

UTC Leeds KS4 - Years 10 & 11

UTC Leeds KS5 - Years 12 & 13
A Levels & Technical Qualifications

Student experience

At UTC Leeds, you feel as though you are working in a supportive business environment.

You will have time available for project work and independent study, with support to help you where you need it.

There are high expectations for standards of behaviour and personal conduct at all times, reflecting the professional environment of the UTC.

Technology is a core part of the learning experience at the UTC, preparing you for the world of work.

All students have the opportunity to experience a variety of activities to enrich their learning, broaden their horizons and offer the chance to try out new things or follow up interests. These can range from sporting and social activities to enrichment clubs. Students studying at UTC Leeds report that it is easy to make friends as everyone shares similar interests.

Dedicated, one-to-one educational and pastoral support is available to all students, with careers advice and guidance integrated throughout.

Our college is committed to ensuring your son or daughter is supported emotionally as well as academically. Mr Smeaton and Mrs Parker head up our safeguarding team along with Mrs Ellis who is the college SENDCo. They are available to meet with you and your son or daughter to discuss any concerns or needs they may have.
“Being at UTC is more like being at work, they treat you like young adults, and they have expert teachers. Because it’s a small school everyone is like a family.”

Rosanna, Y11 Graduate

“Ultimately I think it was one of the best decisions I’ve ever made to move to UTC Leeds. I’ve met some great people, some great teachers, and now I’m going on to be an engineer!”

Benjamin, Y11 Graduate
Day in the life

8:30
I have a profile team meeting this morning. This is where we discuss and develop a wide range of personal attributes and employability skills and review the previous week in college. We produce a personal action plan to ensure we continue to make excellent progress, both academically and in terms of our employability skills.

8:45
I have English next. We are writing a brief for a project that we are developing with Siemens, and my English teacher is helping us to develop the professional communication skills needed to be a successful engineer.

9:35
Computing in the ICT suite. In today’s lesson we are learning to programme to help us with our individual projects.

10:25
Next, we have a briefing at the start of my engineering manufacture lesson. We are learning to use 3D printers and some of the other CNC equipment, so one of our teachers is going to show us the types of components that we can make using the equipment.

11:15
Break. I’ve arranged to meet some friends in the canteen.

11:35
We are in the Design & Media suite for a session on the CAD machines. My design is coming on well and I will be ready to move onto manufacturing it later. I will be using what I did this morning to produce a prototype on the 3D printer.

12:25
Up next, I have Maths. We have been learning Algebra over the last few lessons and will continue with this today.

13:15
Lunch. Catch up with friends and eat in the canteen.

13:45
The last lesson of the day is Science. Today we are focusing on Physics and energy.

14:35
Wednesdays only: Enrichment. We have a choice of what we can do including: sport, VEX Robotics, art, Duke of Edinburgh and climbing, to mention a few. There are leadership and community opportunities which will help to develop my CV. I will be continuing with my quadcopter design and build – we are testing components to see if they improve the performance of the quadcopters.
Real-life challenges

Working with employer partners and experts at the University of Leeds is at the heart of everything we do at the UTC, providing students with the technical, personal and professional skills to stand out from the crowd.

Green energy from hot acid

Global supplier to the printing industry, Agfa Graphics, is represented on the Board of Governors of UTC Leeds and provides significant support including this project challenge.

Agfa uses sulphuric acid to anodise aluminium. The acid is delivered to the factory at 98% and then diluted to feed the process at 64%. This means that Agfa can reduce road transport journeys, cut costs and reduce traffic emissions involved in delivery. The dilution process is exothermic, producing a great deal of heat, and this heat is currently vented to the atmosphere wasting energy.

UTC students are asked to creatively find ways to use this otherwise wasted heat within the factory. There are significant environmental benefits to using the heat and not using the fossil fuel sources currently used to create heat in the factory. The CO₂ emitted by the factory could be reduced, thus lowering greenhouse gas emissions and reducing factory energy costs.

The aim is for the students to provide a solution that has a positive environmental impact and meets the needs of industry.

Artificial limbs

Last year, UTC students were asked to take part in a global project called ‘Team UnLimbited’ to create prosthetic limbs for children in Africa who had lost limbs in landmine blasts. Using the UTC’s 3D printers, students produced mechanical hands from a blueprint provided by TeamUnlimbited. The hands give enough movement to pick up a variety of objects. Some users have even learned to ride a bike or play the piano.

UTC Leeds was selected because of its 3D printer facilities. Charity ‘Enabling the Future’ matches companies or individuals who have 3D printers to people in need of limbs. The UTC has become an officially approved partner of the charity and Year 10 students also built a prosthetic arm for a five-year-old boy.
UTC Leeds Year 10 Prospectus

Apply now!

UTC Leeds admits students into Year 10 and Year 12. There will be 150 places for entry into Year 10 in September 2020.

If you are looking to apply, please contact us as soon as possible to obtain a copy of our application form, either by calling the admissions team on (0113) 353 0140 or you can download a form online at www.utcleeds.co.uk

Entry requirements

There are no minimum entry requirements for students entering Year 10.

UTC Leeds is open to all students from the Leeds City Region, which includes the local authority districts of Barnsley, Bradford, Calderdale, Craven, Harrogate, Kirklees, Leeds, Selby, Wakefield and York. The UTC encourages applications from girls as well as boys, and from all the diverse communities across the Leeds City Region.

In the event of over-subscription, every attempt will be made to ensure that applicants from across the city region have a fair chance of gaining a place, with a waiting list for all applications.

Late applications will be accepted, but places will be subject to availability. The full UTC Leeds admissions policy is available on our website at www.utcleeds.co.uk.

Applications during the school year

For in-year entry during the school year, parents should apply directly to UTC Leeds.

Please contact the admissions team on (0113) 353 0140 or visit the UTC Leeds website www.utcleeds.co.uk.
Open events and taster sessions

We offer a range of taster events and talks for both parents/carers and potential students during the 2019/20 academic year.

Please come along to meet with our Principal, Alex Burnham, and find out more about UTC Leeds.

Full details of these events are available on our website www.utcleeds.co.uk
This school is committed to safeguarding and promoting the wellbeing of children and young people and expects all staff, visitors and volunteers to share this commitment.
